

What's New at Homesnap?

RELEASE UPDATE

NEW FEATURE: SEARCH BY COMMUTE

SUMMARY: Commute time is often a key factor in a buyer's home search. Now, you can search for properties specifically by each household member's commute times.

BENEFIT: This new search capability allows agents to deliver an even more personalized, relevant home search for their clients. With easy access to estimated commute times for each property, clients will feel more confident and well-informed about where they should or shouldn't buy.

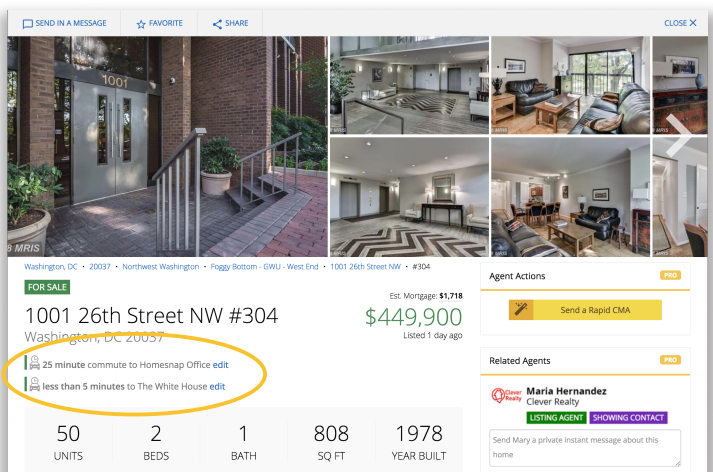

STEPS

- 1 **Select** the Search by Commute icon
- 2 **Input** each desired location and max commute time.
- 3 **Tap** Search

Homesnap will instantly show all neighborhoods and properties fitting this criteria!

You can then layer on additional search filters as desired, and share or save your search for future reference.

Expand on each property to view the exact commute time!
